Compliments on the "sweet girl graduate" have been going the rounds of the press. Let up on that and give praise unto the girl behind the apron in front of the cook stove. She is the real heroine of peace, the main stay of civilization.

A movement is on foot to change the name of "Thomas Cat" to that of "Bob Cat." We are unconditionally opposed to such a change, for Thomas' feline is sublime, and his title as "Teror of the Night" is as immovable as a crown on a crusty old king's head.

NITROGEN NODULES.—Some years ago German scientists discovered that certain organisms attached to the roots of a large family of plants known as legumes. It was well known that this particular family greatly increased the fertility of land by abstracting nitrogen from the air and leaving it, in part, a content of the soil. Other plants had not this power nor the root nodules and this fact suggested the theory that the nodules really gathered the elusive nitrogen. Experiment seemed to verify this hypothesis. It was evident that if the nodule germ or seed could be raised artificially and then made grow where none grew before, that the discoverer of the method would be a real benefactor. Such cultures were made, became an article of sale like any other seed, but German farmers who bought and paid for this seed declared that it was a waste of money. The pictures in the government bulletin—No. 114—of how the plants looked before and after inoculation are paraphrased in these of the "nutraceuticals" with which, in the daily papers, we are all familiar. The reports of those who got cultures free are interesting, but those who, for the same, paid two dollars per acre, will have more trouble in securing equal publicity, and these might not be so assuring. The writer and farmers generally are not equipped to consider this occult innovation in many of its bearings, but what a fund of valuable practical knowledge they can gain by carrying a garden trowel or chisel in the hip pocket when they study the stand of their clover in the bottoms and on the gall'd knolls. The nitrogen nodule is said to make clover grow where none would grow before. If this be true, it is indeed like the metaphors' which in times of stress bleeds its own blood to feed its young. It is too bad not to be a scientist, but why these considerations are so abundant in the rich bottoms and so scarce where they are so badly needed is not clear to the plain man with the trowel or the chisel, and it is up to his learned brother to explain why, when "culture" of the right kind is scattered around abundantly there is so much where it is not needed, and so little where the poor starved pelicans suffering on the stand piles.—Kentucky Farmer and Breeder, Lexington, Ky.

SPECIAL ROUND-TRIP EXCURSIONS ON THE C. & O.—Asbury Park, N. J., National Educational Association. Tickets on sale June 29 and 30, July 1 and 2; limited to July 10. Rate \$21.80. Tickets may be extended to August 31.

## EXCURSIONS TO THE WEST

To the Pacific Coast—to California, Oregon, Washington—round-trip, long transit and return limits, liberal stop-over privileges.

The rate is practically on the basis of one fare for the round trip. Of course, if you wish to visit both California and Oregon or Washington, the cost is slightly more.

These reduced rates are in effect on certain dates in months of May to October, inclusive. They apply from all Eastern points via Chicago, St. Louis or Memphis gateways. The Rock Island System will take you up in either Chicago or St. Louis, or at hundreds of other Middle West points and carry you to the Coast in through Standard or Tourist Sleepers with unexcelled Dining Car service. The Rock Island also affords a choice of routes: on the "Scenic" route you can stop off in Colorado—see Salt Lake City—visit Yellowstone National Park; on the "Southern" route you can go via El Paso, thru New Mexico, then "up coast" to San Francisco and on to Portland or Seattle if desired.

In short, these Pacific Coast excursions offer an unusually good chance to see our western country in a comprehensive manner.

If you desire to go only as far as Colorado, there are excursion rates in effect to that section and return, all summer long, specially reduced June 30 to July 4, August 12 and 13, and August 30 to September 4. Extension trips to Ogden or Salt Lake and return at low cost also.

From September 15 to October 31, 1905, one-way tourist or "colonist" tickets will be on sale to California and the Pacific Northwest—about half regular fare.

If interested, send name and address on this coupon, designating which booklet wanted and to what point you plan to go. Name probable date of start also, so we can advise definitely with respect to rates, etc.
